# 1 Identification

### Product identifier

- Trade name: Tacusil 410013
  - Recommended use Cyanoacrylate Adhesive Restrictions on use For industrial use only

# Details of the supplier of the safety data sheet Manufacturer/Supplier:

- ResinLab China Room 9,11 Floor, Chuangxin Building Block 1, No.1, Technology Road, Technology Chuangxin Park, West of Dayabay, Huizhou City, Guangdong, P.R. China (86 752) 5533798
- Information Department: Product Safety Department: msds@resinlab.com
- Emergency Telephone Number: North America Chemtrec: 1-800-424-9300 (24 hours) International Chemtrec: 01-703-527-3887 (24 hours)

## 2 Hazard(s) identification

Classification of the substance or mixture

Flam. Liq. 4 H227 Combustible liquid.

Skin Irrit. 2 H315 Causes skin irritation.

- Eye Irrit. 2A H319 Causes serious eye irritation.
- STOT SE 3 H335 May cause respiratory irritation.

### Label elements

GHS label elements The product is classified and labeled according to the Globally Harmonized System (GHS). Hazard pictograms

Signal word Warning

- Hazard-determining components of labeling: Ethyl 2-cyanoacrylate
   Hazard statements
   H227 Combustible liquid.
   H315 Causes skin irritation.
   H319 Causes serious eye irritation.
   H335 May cause respiratory irritation.
   Precautionary statements
   Keen away from flames and hot surfaces No series

- Keep away from flames and hot surfaces. No smoking.

Reep away from flames and not surfaces. – No smoking. Avoid breathing dust/fume/gas/mist/vapors/spray Wash thoroughly after handling. Use only outdoors or in a well-ventilated area. Wear protective gloves / eye protection / face protection. If on skin: Wash with plenty of water. IF INHALED: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a poison center/doctor if you feel unwell. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse

Take off contaminated clothing and wash it before reuse.

- If eye irritation persists: Get medical advice/attention. In case of fire: Use for extinction: CO2, powder or water spray. Store in a well-ventilated place. Keep container tightly closed. Store in a well-ventilated place. Keep cool.

Store locked up. Dispose of contents/container in accordance with local/regional/national/international regulations.

Classification system: NFPA System NFPA ratings (scale 0 - 4)

NFPA special hazards (water reactivity and oxidizing property): None

· HMIS System · HMIS-ratings (scale 0 - 4)

HEALTH 2 Health = 2 Fire = 2 FIRE 2 Reactivity = 0 **REACTIVITY** 0

• Other hazards Results of PBT and vPvB assessment • PBT: Not applicable.

## 3 Composition/information on ingredients

· Chemical characterization: Mixtures

Dangerous components: CAS: 7085-85-0 EINECS: 230-391-5 Index number: 607-236-00-9 RTECS: UD3330050 Skin Irrit. 2, H315: Eye Irrit. 2A, H319; STOT SE 3, H335 Flam. Lig. 4, H227 Ethyl 2-cyanoacrylate 70-80% · Additional information:

If the chemical name/CAS number is proprietary and or weight percentage is listed as a range, the specific chemical identity and or percentage of composition has been withheld as a trade secret.

## 4 First-aid measures

Description of first aid measures
 General information: Immediately remove any clothing soiled by the product.

After inhalation: Remove victim from exposure to fresh air. Keep person at rest. Provide oxygen if person is not breathing. In case of unconsciousness place patient stably in side position for transportation.

- After skin contact:

Do not pull bonded skin apart. Use a blunt object such as a spoon to gently release the bonded skin. Soaking in warm soapy water will aid with the debonding. Remove all contaminated clothing and wash before reuse.

After eye contact:

Immediately flush with plenty of water for at least 15 minutes. Get medical attention. If eyelids are bonded closed, release eyelashes with warm water by covering with a wet pad. Do not force eye open. Cyanoacrylate will bond to eye protein and will cause a lachrymatory effect which will help to debond the adhesive. Keep eye covered until debonding is complete, usually within 1-3 days. Medical attention should be sought in case solid particles of polymerized cyanoacrylate trapped behind the eyelid caused abrasive damage.

After swallowing: If victim is unconscious; never give anything by mouth. Peel or roll skin apart. Adhesive becomes solid in contact with saliva and may adhere to inside of mouth. Saliva will lift adhesive in 1-2 days. Avoid swallowing solid adhesive after detachment.

Information for doctor:

Most important symptoms and effects, both acute and delayed No further relevant information available.

Indication of any immediate medical attention and special freatment needed Check section 11 Toxicological Information for further relevant information.

## 5 Fire-fighting measures

Extinguishing media
 Suitable extinguishing agents:
 CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
 Special hazards arising from the substance or mixture Carbon dioxide (CO<sub>2</sub>) and Carbon monoxide (CO)

**Protective equipment:** If employees are expected to fight fires, they must be trained and equipped as stated in the OSHA fire brigades standard (29 CFR 1910.156).

As with any fire, wear positive-pressure self-contained breathing apparatus and full protective gear that are NIOSH approved.

# 6 Accidental release measures

- **Personal precautions, protective equipment and emergency procedures** Wear protective equipment. Keep unprotected persons away. Do not breathe gas, vapors, dusts or mists if their inhalable particles occur during use.

**Environmental precautions:** Prevent seepage into sewage system, workpits and cellars. Inform respective authorities in case of seepage into water course or sewage system.

- Methods and material for containment and cleaning up: For large spills: provide diking or containment to minimize spreading. If possible pump and store material in appropriate container. For small spills: Ventilate and wash area. Collect spills and absorbant material in appropriate container.
- Ensure adequate ventilation.

Dispose contaminated material as waste according to item 13. Flood with water to polymerize and scrape off of the floor. Dispose as non hazardous waste. Do not use cotton, wool or carbon fiber type materials for absorbants. These types of materials react exothermically with the cyanoacrylate.

# 7 Handling and storage

· Handling:

Precautions for safe handling Ensure good ventilation/exhaustion at the workplace.

Prevent formation of aerosols.

(Contd. of page 2)

Keep away from incompatible material(s). Avoid any release into the environment. Do not allow the material to come in contact with cotton, wool, leather, fiberglass or carbon fiber. The reaction between cyanoacrylate and these materials results in a rapid exothermic reaction that can cause serious burns and release an irritating smoke. Do not breathe dust/fumes/mist/vapor/spray. Avoid contact with eyes, skin and clothing. Keep away from heat,sparks, flames and ignition sources.

Observe all the personal protection requirements in Section 8.

Conditions for safe storage, including any incompatibilities

Storage:

Requirements to be met by storerooms and receptacles:
 Keep stored in accordance with local, regional, national, and international regulations.

8 Exposure controls/personal protection

### · Control parameters

Components with limit values that require monitoring at the workplace:

## 7085-85-0 Ethyl 2-cyanoacrylate

TLV Short-term value: 5.1 mg/m<sup>3</sup>, 1 ppm

Long-term value: 1 mg/m³, 0.2 ppm DSEN, RSEN

Additional Occupational Exposure Limit Values for possible hazards during processing: None.

#### Exposure controls

If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. • Personal protective equipment: • General protective and hygienic measures: Keep away from foodstuffs, beverages and feed. Keep away from foodstuffs, beverages and feed.

Immediately remove all solled and contaminated clothing. Wash hands before breaks and at the end of work.

Avoid contact with the eyes and skin.

Personal Protective Equipment (PPE) Breathing equipment: Sufficient ventilation in pattern and volume should be provided in order to maintain air contaminant levels below recommended exposure limits.

Use a NIOSH approved air-purifying organic vapor respirator if occupational limits are exceeded. For emergency situations, confined space use, or other conditions where exposure limits may be greatly exceeded, use an approved air supplied respirator. Observe OSHA regulations (29CFR 1910.134) for respirator use. Protection of hands:

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation • Material of gloves

Chemical resistant gloves

· Eye protection:

Safety Glasses with side shields

Body protection: Appropriate chemical resistant clothing.

Limitation and supervision of exposure into the environment The Engineering measures or controls, and PPE recommendations are only guidelines and may not apply to every situation. For additional information, please consult the corresponding requirements under OSHA 29 CFR 1910.94-95, and 29 CFR 1910.132-138.
