 Product Identifier Trade Name: 810088

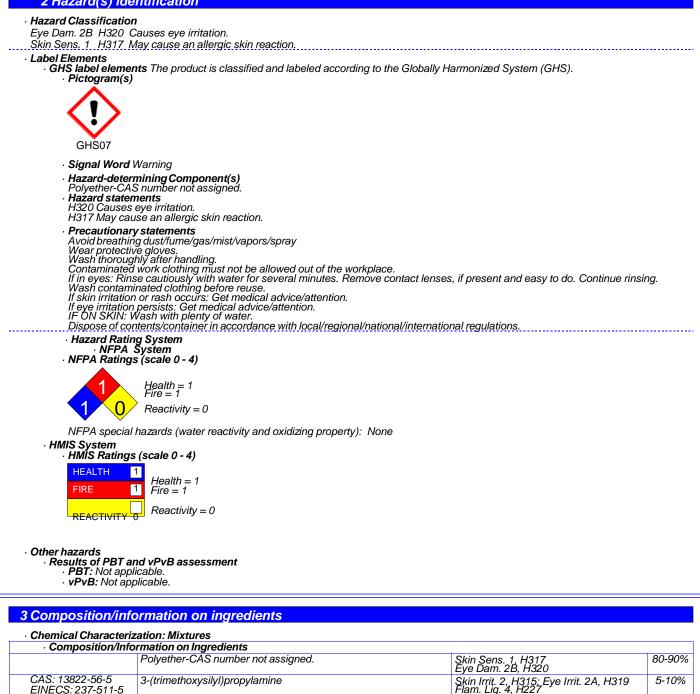

- Application of the Substance or Mixture: Silicone Fluid
- · Details of the Supplier of the Safety Data Sheet (SDS)

Manufacturer or Supplier:

- KitPackers Room 9,11 Floor, Chuangxin Building Block 1, No.1, Technology Road, Technology Chuangxin Park, West of Dayabay, Huizhou City, Guangdong, P.R. China (86 752) 533798
- · Information Department: Product Safety Department: msds@resinlab.com

- North America Chemtrec: 1-800-424-9300 (24 hours) International Chemtrec: 01-703-527-3887 (24 hours)

2 Hazard(s) identification

CAS: 870-08-6 EINECS: 212-791-1 RTECS: WH 7620000

dioctyltin oxide

EINECS: 237-511-5

Classification System: The Classifications were based on the Toxicological and Ecological Data of the substances/mixtures in the Section 11 and 12. (Contd. on page 2)US

Print Date 07/02/2019

Revision Date 07/02/2019

(Contd. of page 1)

Additional Information:

If the chemical name/CAS number is proprietary and or weight percentage is listed as a range, the specific chemical identity and or percentage of composition has been withheld as a trade secret.

4 First-aid measures

Description of First Aid Measures General Information

Ensure medical personnel are aware of exposure and take precautions for their personal protection; see Section 8 for the information of personal protection.

After Inhalation

Remove victim from exposure to fresh air. Keep person at rest. Provide oxygen if person is not breathing. In case of unconsciousness place patient stably in side position for transportation. Supply fresh air; consult doctor in case of complaints.

After Skin Contact

Gently wash contaminated skin with water. Remove all contaminated clothing and wash before reuse. Seek medical treatment in case of complaints.

After Eye Contact

Rinse opened eyes under running water for at least 15 minutes. Remove contact lenses if present and easy to do so; continue rinsing. Seek medical advice.

After Swallowing

If victim is unconscious; never give anything by mouth. If victim is conscious; rinse out mouth and give victim small amounts of water. Get medical attention

After Exposure Seek medical treatment in case of complaints.

- Information for Doctor Have chemical containers, labels and/or (M)SDS ready when calling or visiting a medical center. Indication of any Immediate Medical Attention and Special Treatment Needed
 - skin tests

Check section 11 Toxicological Information for further relevant information.

Additional Information

For additional information, please consult the corresponding first aid measures in the most current version of Emergency Response Guidebook which is produced by the US Department of Transportation.

5 Fire-fighting measures

Extinguishing Media Suitable Extinguishing Agent(s)

Use fire fighting measures and extinguishing agents that suit the environment. In case of fire, suitable extinguishing agents are: Alcohol resistant foam.

 $\operatorname{Bry}_{\operatorname{chemical}}$ or fire extinguishing powder.

Water spray or water fog. Unsuitable Extinguishing Agent(s) No relevant information.

Firefighting Procedures

Isolate fire and deny unnecessary entry. Eliminate all ignition sources if safe to do so. Do not extinguish fire unless flow can be stopped.

Burning liquids may be moved by flushing with water; protect personnel and minimize property damage. Fight fire from protected location or safe distance. Contain fire water runoff if possible to prevent environmental pollution.

Special Hazards Arising in Fire

Will not burn unless preheated. In case of fire, following can be released:

ecation of deby dee 2 and chirand montex and an aterials.

Advice for Firefighters

If employees are expected to fight fires, they must be trained and equipped as stated in the OSHA fire brigades standard (29 CFR 1910.156).

- As with any fire, wear positive-pressure self-contained breathing apparatus and full protective gear that are NIOSH approved.
- · Additional Information Ensure adequate and functional fire fighting facilities equipped in working area at all times.

6 Accidental release measures

Personal Precautions

- Do not breathe gas, vapors, dusts or mists if their inhalable particles occur during use
- Ensure personnel take precautions for their personal protection during clean up, see Section 8 for the specific requirements.
- · Environmental Precautions No further relevant information.

Cleaning Up Methods Ensure adequate ventilation. Eliminate all ignition sources. Keep unauthorized personnel away. For large spills:

Additional Information
 All protective clothing (suits, gloves, footwear, headgear) should be clean, available every day, and put on before work.

The Engineering measures or controls, and PPE recommendations are only guidelines and may not apply to every situation. For additional information, please consult the corresponding requirements under OSHA 29 CFR 1910.94-95, and 29 CFR 1910.132-138.

9 Physical and chemical properties

· · · ·					
Information on Basic Physical and Chemical Properties					
· Appearance:	·				
Form:	Viscous

10 Stability and reactivity

· Physical Hazard(s) Not a regulated reactive or physical hazard under GHS.

· Hazardous Reactivity and Chemical Stability Stable under normal conditions of use, storage and temperatures.

· Thermal Decomposition and Conditions to be Avoided

Keep away from incompatible material(s).

Thermally decomposes during fire or high heat; keep away from heat, sparks, open flame and other ignition sources.

· Possibility of Other Hazardous Reaction(s) No further relevant information available.

Incompatible Material(s) Oxidizing agents Free radical producing initiators.

Peroxides

Bases (Alkalis) Hazardous Decomposition Product(s)

Thermally decomposes during fire or very high heat. See Section 5 for fire hazards evolved during thermal decomposition.

· Hazardous Polymerization Product(s) No relevant information.

· Additional Information No further relevant information.

12 Ecological information

 Aquatic Environmental Toxicity Assessment: No further relevant information; classification is not possible.
 Degradability and Bioaccumulation Assessment: Non-rapidly degradable, and low bioaccumulative. Additional Information No further relevant information.

13 Disposal considerations

· Hazardous Waste List

- · Description: It may be necessary to contain and dispose of the substance/mixture as a hazardous waste.
- Waste Treatment Recommendation:
- Generation of waste should be avoided or minimized wherever possible. Chemical waste, even small quantities, is neither allowed to be poured down drains, sewage system or waterways; nor disposed with household garbage.

Dispose of contents/containers in accordance with local, regional, national, and international regulations.

· Unused and Uncontaminated Packagings

· Recommendation Dispose of according to your local waste regulations.

14 Transport information
